WORK EXPERIENCE

SOFTWARE ENGINEER

Verys   **Aug 2021 - Present**

- Taking back-end and QA Jira tickets and completing them within the given points.
- Working on new features using Python and SQL while familiarizing myself with the code base.
- Testing application's latest features using Selenium and Behave while also manually testing and reporting bugs.
- Coordinating alongside client and team, ensuring the application is bug-free and ready for production.

TECH SUPPORT AGENT

Harte Hanks   **Sep 2019 - Feb 2021**

- Develop troubleshooting procedures to help both support personnel and end users interact properly with hardware and software.
- Logging information about the correspondence into the company's system to keep a record of actions.
- Communicate clearly and effectively with end users, colleagues, and management to quickly resolve issues and ensure customer satisfaction.

PROJECTS

NYTimes Bestseller 🔗   **Present**

- Using the NYTimes API to manipulate data with ReactJS and styling with Styled-Components.

Features: Pagination, Cache, search/checkbox Filtering, Sorting, and Carousels.

Spamazon 🔗   **Jun 2021**

- An e-commerce app with features like CRUD, authentication, and full cart functionality including a mock purchase page.

Tech: ReactJS, PSQL, Python, Django, CSS, and full authentication with Firebase.

Reviewt 🔗   **May 2021**

- Created an app which allows having users post reviews on their most favorite (or hateful) products.

Tech: Javascript, JQuery, EJS, HTML, CSS, MongoDB, Mongoose, Express, and full authentication with express session and Bcrypt.
